

Bunded Lock-Ups

The *Cashels* range of **Bunded Lock-Ups** are designed and manufactured to help the customer to comply with Environmental Protection Agency regulations regarding the safe and secure storage of dangerous goods (*ISO 14001, REACH Directive, etc.*).

Cashels **Bunded Lock-Ups** are primarily designed for the safe and legal storage of insecticides, pesticides, diesel fuel, petroleum product and cleaning agents. they are used mainly by local authorities, golf clubs, wholesale nurseries, agricultural co-ops and farms.

The floor of the **Bunded Lock-Up** is a Hot-Dip galvanised removable steel grid, allowing any waste to flow into the 110% reservoir and be removed with ease. The grid also acts as the bottom shelf tray.

Key Features:

- 110% Bund Reservoir.
- 3mm steel construction throughout, with all seams fully welded.
- Lifting eyes.
- Forklift tunnels.
- High-security door lock with 3-point lock system - featuring MUL-T-LOCK® hardened hasps and padlock. Keys are only available through a registered key system.
- Innovative hinge design - if the outer hinges are cut, the door still cannot be removed.
- High gloss 2-pack polyurethane paint finish over primer gives long-lasting durability.

Floor grid allows waste into bund reservoir
